

# ILSI Research Foundation Hires New Scientific Program Manager

July 2015  
Washington, DC

Dr. Xianglu Han brings over 16 years of experience to the International Life Sciences Institute Research Foundation

The International Life Sciences Institute Research Foundation (ILSI Research Foundation) is pleased to announce that Dr. Xianglu Han has joined the foundation as a Scientific Program Manager for the Center for Safety Assessment of Food and Feed. Dr. Han will work to further develop and contribute to the ILSI Research Foundation's growing portfolio of international programs.

Dr. Han comes with a wealth of experience in food safety and toxicology. He received his doctorate in toxicology from the University of Rochester, and master's degrees from the University of Georgia College of Public Health and the Chinese Center for Disease Control. Following Fellowships with both Dow Chemical Company and the U.S. Food and Drug Administration, Dr. Han joins

the ILSI Research Foundation from his previous position at Arcadis Company as a Project Toxicologist. He has significant lab experience as well as strong skills in computational toxicology, data analysis and risk assessment. Dr. Han has published 15 peer-reviewed articles related to toxicology and public health, reaching international audiences.

As a Scientific Program Manager, Dr. Han will contribute to the design and implementation of programs that promote science-based approaches to the safety assessment of foods and feeds, with a strong emphasis on improved knowledge dissemination and capacity building. He will also help ensure these programs are international in scope, have balanced participation from stakeholders and are impactful.

---

*Dr. Andrew Roberts, Director of the Center for Safety Assessment of Food and Feed, stated, "We are very excited to welcome Dr. Han to the team at the ILSI Research Foundation. He brings to us knowledge and expertise that will have an immediate impact on our food and feed safety programs across the world."*

---

*Dr. Adam Drewnowski, Chairman, ILSI Research Foundation's Board of Trustees shared, "I couldn't be more pleased with this announcement. Dr. Han's experience will support the vision of the ILSI Research Foundation as a global partner in generating and disseminating scientific information for public benefit."*

---

*The ILSI Research Foundation improves environmental sustainability and human health by advancing science to address real world problems.*

*The ILSI Research Foundation's programs in nutrition, toxicology, risk assessment and agriculture are informed and strengthened by the deliberate inclusion of international, multi-sectoral expertise and perspectives.*
